Course Syllabus

Course Title: HAZWOPER 40-hour Technician

Course Duration: 40 hours

Program: Hazardous Materials Program

Level of Training: Performance – Offensive (OSHA Technician)

Course Prerequisites: 24 hours of OSHA HAZWOPER Operations Training

Recommended Prerequisites: Technical Rescue Awareness

Course Description: This course is designed to train individuals who respond to releases or potential releases of hazardous substances for the purpose of stopping the release. They assume a more aggressive role than a first responder at the operations level in that they will approach the point of the release in order to plug, patch, or otherwise stop the release of the hazardous substance. The course covers: implementation of the employer’s emergency response plan, classification and identification of unknown materials using field survey instruments, functioning within the Incident Command System, selection and use of specialized chemical protective equipment, hazard and risk assessment techniques, performing advanced product control operations, implementation of decontamination procedures, understanding proper termination procedures, and understanding basic chemical and toxicological terminology.

This course meets or exceeds the requirements of OSHA 29 CFR 1910.120(q) for Hazardous Materials Technician Training. It is intended for industrial and private response teams, who in their normal course of duty would be responsible for responding to a release of a known product.

This course does not meet all of the requirements of NFPA 472 and thus is not intended for public safety agencies (ie. fire, police, military, etc).
Course Content:

Module: 1
Title: Laws and Regulations

Terminal Learning Objective:
At the conclusion of this module, the student will *explain* the laws, regulations and standards that apply to hazardous materials incidents.

Module: 2
Title: Response Components

Terminal Learning Objective:
At the conclusion of this module, the student will *explain* the 5-step Isolate to Terminate process and how it affects the hazardous materials response.

Module: 3
Title: Chemical and Physical Properties

Terminal Learning Objective:
At the conclusion of this module, the student will *apply* chemical and physical properties of a material to predict how hazardous materials respond in different situations.

Module: 4
Title: Toxicology

Terminal Learning Objective:
At the conclusion of this module, the student will *explain* how hazardous materials enter the body and what their potential effects are.

Module: 5
Title: Collecting & Interpreting Hazard & Response Information

Terminal Learning Objective:
At the conclusion of this module, the student will *utilize* a minimum of three resources to collect and interpret information concerning a hazardous material.
Module: 6
Title: Personal Protective Equipment

**Terminal Learning Objective:**
At the conclusion of this module, the student will *demonstrate* the proper selection, use, and maintenance of all four EPA ensemble classifications.

Drill One – Suit Familiarization

Module: 7
Title: Recognition and Identification

**Terminal Learning Objective:**
At the conclusion of this module, the student will *recognize* different types of containers and markings and *determine* the hazards associated with the materials transported or stored within the container.

Module: 8
Title: Monitoring

**Terminal Learning Objective:**
At the conclusion of this module, the student will *demonstrate* the use of monitoring equipment available to the hazardous materials Technician.

Module: 9
Title: Container Behavior

**Terminal Learning Objective:**
At the conclusion of this module, the student will *identify* factors that determine how hazardous materials containers will behave during an incident and *develop* a strategy for a response based on the analysis of the container and it’s behavior.

Drill Two – Skill Stations in Level A

Module: 10
Title: Control Functions

**Terminal Learning Objective:**
At the conclusion of this module, the student will *demonstrate* performing control functions, available to the Technician, in support of the Incident Action Plan.
Module:  11
Title:  Site Safety Plan

Terminal Learning Objective:
At the conclusion of this module, the student will demonstrate the completion of a Site Safety Plan.

Module:  12
Title:  Incident Management System

Terminal Learning Objective:
At the conclusion of this module, the student will identify the positions that make up the Incident Management System and how to use IMS, Unified Command and NIMS at a hazardous materials incident.

Drill Three – Tech Level Skills in Level A

Module:  13
Title:  Decontamination

Terminal Learning Objective:
At the conclusion of this module, the student will demonstrate proper selection, set-up, operation, and tear down of a decontamination line.

Module:  14
Title:  Standard Operating Guidelines and Emergency Response Plan

Terminal Learning Objective:
At the conclusion of this module, the student will summarize key information that should be contained in Standard Operating Guidelines (SOG) and Emergency Response Plans for hazardous materials incidents.

Module:  15
Title:  Termination

Terminal Learning Objective:
At the conclusion of this module, the student will explain procedures to be followed at the termination of a hazardous materials incident.
Tabletop – Site Specific

Final Incident – Site Specific

Textbook:

Evaluation Strategy:
Written and practical skills testing are conducted at the end of the course. In addition, simulated evolutions involving various hazardous materials situations are conducted throughout the course.
