

ILLINOIS FIRE SERVICE INSTITUTE

CORNERSTONE TRAINING

FIREFIGHTING SKILLS TRAINING
PROVIDED AT NO COST
TO ILLINOIS FIRE DEPARTMENTS

Helping Firefighters Do Their Work Through Training, Education, Information, and Research.

WHAT IS THE IFSI CORNERSTONE PROGRAM?

The Illinois Fire Service Institute Cornerstone Program supports fundamental and essential skills training for fire departments and mutual aid organizations throughout the state. The training is coordinated through eight IFSI Regional Representatives who work with local departments in determining specific training needs and scheduling relevant training opportunities. Funding for Cornerstone Program courses is supported through the Office of the Illinois State Fire Marshal so training is delivered at no cost to students or local fire departments.

Each year, IFSI delivers an average of 450+ courses to over 900 departments and serves over 11,000 students through the Cornerstone Program.

The goal of the Cornerstone Program is to provide basic training at the firefighter, vehicle operator, company officer, and chief officer levels at increments and locations convenient to students and fire department personnel. Regional Representatives work diligently to offer training to departments fiscally unable to participate in certification programs.

Contact your Regional Representative about your specific training needs. They can customize course offerings and training schedules to support your local department.
